

# SQUAMISH VALLEY ROD AND GUN CLUB

## Presidents Report Three

September 2008

First I want to congratulate the Archery Section and members who were very successful in recent completions.

Also the success we had in having the reopening of duck and geese hunting in the Squamish estuary.

This month's general meeting was attended by six members. I am concerned that with number of members that we have that so few attend meetings. To run a club successfully requires that members participate in decision making and projects that contribute to having an organization and facilities that members and potential members want to belong to. Those same members who continue to be the frame work of the organization need help. Without them and other members failing to contribute will result in a slow determination and eventual non existing Squamish Rod and Gun Club!

### Range Use

Each of us when using the range has a duty to see that fellow members and their guests are observing the range rules. One accident could result in the range being "CLOSED".

As range users we also have a duty to insure that fellow members and their guests are:

1. Cleaning up after they shoot
2. Not using anything they can lay their hands on to shoot at then leaving the mess behind
3. Day users are Paying their fee

### **GOOD NEWS**

Kiewit staff is reviewing the proposed remediation work that the club has requested in compensation for having impacted on our club and facilities over the past years.

### **VOLUNTEERS REQUIRED**

Once the Kiewit remediation plan is agreed to, work parties will be required to work with Kiewit in cleaning up and building new facilities such as the trap range.

### **CLUB FACILITY SCHEDULE**

The September and October schedules are available.

Cheers

Mike
